How to Create and Integrate a Click-to- Tweet on your Landing Page

wishpond.com

1. Head to clicktotweet.com and click “Basic Link” to get rolling.

The screenshot shows the top navigation bar of the clicktotweet.com website. The navigation bar is dark blue with the 'clicktotweet' logo on the left. To the right of the logo are links for 'Tour', 'Downloads', 'Basic Link', and 'Help'. The 'Basic Link' link is highlighted with an orange border. On the far right of the navigation bar is a green button labeled 'Sign in with Twitter'. Below the navigation bar, the main content area is white and features the text 'The easiest way to promote & advertise your stuff on Twitter (and it's free)'. At the bottom of this content area is a green button labeled 'Sign in with Twitter to get started'.

2. On the next screen, enter the message you want to be Tweeted

The screenshot shows the 'clicktotweet' website interface. At the top, there is a navigation bar with links for 'Tour', 'Downloads', 'Basic Link', and 'Help', along with a 'Sign in with Twitter' button. The main heading is 'Create Basic Link'. Below this, a message states: 'You can create as many of these links as you want, but they are not tracked and stats are not recorded for them.' The form is titled 'Message you would like tweeted' and contains a text input field with the text: 'Check out this webinar I just signed up for! <http://bit.ly/YkhSso>'. To the right of the input field, a grey box indicates '75 characters left.' At the bottom of the form, there is a green button labeled 'Generate New Link'.

3. Because ClickToTweet doesn't shorten your links for you, you'll need to head to bitly.com and create a shortened URL link.

Simply drag and drop your long-form url into the box. Bitly will automatically shorten it for you.

Copy and paste your shortened link into the ClickToTweet box.

4. Click “Generate New Link”
